

tealbook is a machine learning platform that transforms static lists of suppliers into communities that provide a real-time and dynamic view of your entire supplier base. tealbook allows team members to collaborate while improving and preserving supplier information. Enhanced relationships drive faster, smarter supplier decisions and better outcomes. tealbook is used to **ENRICH** knowledge and visibility of existing and preferred suppliers, **EXPLORE** relevant suppliers for all new business requirements and grow the **IMPACT** of innovation and diversity programs.

How tealbook helps achieve your goals:

ENRICH

Know your suppliers

Our customers increase access and knowledge of existing and preferred suppliers across the organization to more effectively leverage contracts and reduce cycle time. tealbook consolidates organizations' valuable institutional knowledge and performance of suppliers to preserve info and improve relationships with direct collaboration from suppliers.

EXPLORE

Find the most trusted suppliers

The platform expands and accelerates supplier discovery efforts to reduce cycle time when meeting new business requirements. Our customers are able to instantly generate lists of qualified, relevant suppliers similar to those they already work with, ensuring the best options are always considered.

IMPACT

Grow the impact of your diversity programs

We support our customers in building and growing a dynamic and relevant community of suppliers to support goals for innovation and diversity. Using tealbook, organizations can increase access and visibility of those suppliers while improving data quality critical for accurate reporting.
